- Experience with Git, Docker, VPS, and CI/CD pipelines.
- Wrote and maintain clear technical documentation for code and development processes.

Projects

Crypto platform, Stealth (**Vue, React, ASP.Net, Microsoft SQL, Signal-r**)

- TanStack Query was used for API state, and Vuex for managing component state.
- Best practices were followed throughout development to ensure a maintainable and scalable application.
- Analytical data was collected to help us enhance UX, leading to 100% correct usage of design

Copax (**React, Next.js, Nest.js, MongoDB, Turbo repo**)

- Fleet management & tracking system, has complex forms, charts, and multiple maps integration,
- UI was created using MUI, we focused on standards, a modern color palette, font variants, and more.
- Unit tests were written, with Jest, to ensure the logic was intact during refactoring, e2e using Cypress.

Skills

React, Vue Next.js and Nuxt (CSR, SSR, SSG, ISR, On-demand Revalidation, Proxy, Cookies, SEO), CSS, JavaScript, Typescript, tRPC, SEO, Immer, Vuex, Pinia, Redux, Context API, Zustand, Rxjs, React-query, REST APIs, Gql, Socket.io, Firebase, Leaflet, **Figma**, Tailwind, MUI, Ant design, Cypress, Playwright, Jest, Monorepo (Nx, Turborepo, Lerna), **NodeJS**, PostgreSQL, Prisma, OpenAI API, **Azure**

Web3: solidity, openzeppelin, ethers.js, viem, chainlink/functions-toolkit, Oracles(VRF, Functions, Automation, and data-feeds), Remix, Hardhat (deployment, verification)

Education

• **ASPU - University Bachelor of Engineering, Computer Software Engineering**

Damascus, Syria

• **Amazon Web Services Cloud Practitioner**

Languages

• Arabic (Mother tongue) • English (Fluent)
